## Days 2 - 3: Corbett NP

Corbett is India's first national park and one of its finest. It is notable not only for its rich and varied wildlife and birdlife but also for its scenic charm and magnificent mountain and river views. The park comprises the broad valley of Ramganga River backing onto the forestcovered slopes of the Himalayan foothills.

There is an immensely rich flora – 110 species of trees, 51 species of shrubs, 33 species of bamboos and 27 species of climbers. The valley floor is covered with tall elephant grass, lantana bushes and patches of Sal and Sheesham. The fauna is as rich as the flora. The park has always been noted for its tigers, which are seen quite frequently. There are leopards too but they are seldom seen. In all there are over 50 species of mammal alone.

Corbett is a bird-watcher's paradise with over 600 species, and since the creation of the Kalagarh Dam on the Ramganga River, large numbers of waterfowl have been attracted here. Overnight - [Corbett NP](#)
